93. Feb 7 released
94. Feb 9 confessions
95. March 10 released

Prosecution Investigation

- This is not only a rumor but the Uttarakhand Pharmaceuticals Manufacturing Association, caught these Narcotic Agents red handed in a sting operation.

Judicial System

- The High Court is closed from Dec to Feb 22.
- Then the Judge had brain hemorrhage & is no longer working.
- Then Uttarakhand was under central rule & there was chaos in the whole state for 1 month.
- Then 2nd bail application was submitted in June 2016.
- The Judge refused to hear the case and gave two options to withdraw the application or get it rejected.
- During this time – Colette has been to the hospital over 100 times.
- Colette has been referred to specialist at AIIMS Delhi 30 times and missed 40 appointments made with specialists because the required police escort was not available.
- Her father came to India 5 times to visit & it was miserable.
- The emotional, physical, financial toll this has taken on my family is devastating. I feel guilty because of the pain it has caused my family.
- The US Embassy comes every month to make sure Colette is still alive. They can not do anything more than TLC. They cannot interfere in the Indian Judicial System.

- Colette is at the mercy of the courts who are biased to ALL Narcotics & Drug (NDPS) cases. The regular public is not able to differentiate between standard seizure of drugs case VS. this case which is primarily documentary in nature.
- There are 6 people in JAIL for a cumulative period of 93 months, The investigation is botched documents were concealed by a national agency, whose agents manipulate the Judicial System to prevent any of the accused from getting bail.
- The resources this Agency has spent to keep the accused shut up & in prison is ridiculous. Colette is the most expensive prisoner & her medical expenses for FY 2015-2016 was over 25 lac.
- A narcotic crime is viewed in India as more heinous in nature than murder. It is easier for accused murderers to get bail that a person charged under NDPS.
