TO WHOM IT MAY CONCERN

This is to certify that Ms. Colette Nicole Smith, CR No EXT42940 is suffering from allergic vulvo-vaginitis and recurrent urinary tract infection. She has had severe sepsis from urinary tract infection requiring hospitalization and also developed psychosis. This she acquired while she was in custody. She is currently under intense psychiatric observation. She also had been treated for endometriosis. As she is known case of endometriosis and MRI was done at Rajiv Gandhi Cancer Institute and Research Centre, showed polycystic pattern of ovary which has to be followed up. She has been prescribed Anti-allergic and serratiopeptidase. In view of her severe sepsis because of UTI she is advised to be in very hygienic environment and the environment in jail is not safe for such patients as these patient can have recurrence of server UTI and sepsis. She is advised to come after 2 weeks for follow up. She will also need ultrasound examination after 3 months and repeat MRI of abdomen if she develops symptoms of endometriosis again.

Dr. Sudhir Rawal
Director - surgical oncology
